

Professional Summary

AI Engineer with experience building **Generative AI, Agentic AI, NLP, RAG, MCP-based workflows, SDK integrations, and scalable backend systems**. Skilled in **Python, FastAPI, PyTorch, Scikit-Learn, LangChain, FAISS, REST APIs, vector search, and enterprise AI automation**.

Technical Skills

Programming Languages: Python, Java, SQL, Data Structures & Algorithms, Object-Oriented Programming

AI / ML / GenAI: Generative AI, Agentic AI, NLP, RAG, Transformers, PyTorch, Scikit-Learn, Hugging Face, Prompt Engineering, Embeddings, Vector Search, Semantic Retrieval, Intent Classification, Entity Extraction, LLM Applications

Frameworks & Libraries: FastAPI, Flask, Rasa, LangChain, FAISS, Pandas, NumPy

Backend & APIs: REST APIs, SDK Development, MCP (Model Context Protocol), API Design, Microservices, Backend Optimization, Scalable Systems

Databases: MySQL, MongoDB, Vector Databases, FAISS

Cloud & DevOps: AWS, Azure, Docker, Git, GitHub, GitHub Actions, CI/CD Pipelines, Postman, Swagger UI

Experience

Tata Consultancy Services Ltd.

Product Engineer

Oct 2024 – Present

Gurugram, Haryana

- Developed enterprise AI applications using LLMs, embeddings, semantic retrieval systems, and FAISS-powered vector search.
- Built Rasa-based NLP solutions implementing intent classification, entity extraction, dialogue orchestration, and chatbot integrations.
- Converted enterprise Java SDKs into Python SDKs and integrated them with MCP-based workflows for AI orchestration.
- Designed end-to-end AI pipelines connecting SDK layers, MCP services, retrieval systems, enterprise data sources, and backend APIs.
- Developed scalable REST APIs supporting enterprise AI automation, integrations, and cloud-ready deployments.

Soven Developer

Frontend Developer Intern

Jun 2024 – Sept 2024

Remote

- Developed responsive UI components and integrated frontend applications with backend APIs for data-driven web platforms.
- Improved application usability and performance through collaboration with designers and backend engineering teams.

Projects

Enterprise AI SQL Copilot

Python, FastAPI, RAG, FAISS, Agentic AI, LLMs

- Built an enterprise-grade Text-to-SQL AI Copilot using RAG, hybrid retrieval, schema-aware SQL generation, and semantic search.
- Designed a multi-agent architecture including Intent Detection, Entity Resolution, Schema Linking, Join Discovery, Query Planning, Validation, and Confidence Scoring agents.
- Implemented planner diagnostics, semantic validation, confidence calibration, and benchmark evaluation workflows.
- Integrated FAISS-based vector retrieval and FastAPI services for enterprise analytics and explainable SQL generation.

Enterprise AI Conversational Platform

Rasa, FastAPI, LangChain, FAISS, MCP

- Built enterprise conversational AI solutions using Rasa, LLM integrations, LangChain workflows, Retrieval-Augmented Generation (RAG), and semantic retrieval systems.
- Developed custom Python SDKs from enterprise Java SDKs and integrated them into MCP-based orchestration pipelines.
- Implemented FAISS-powered semantic retrieval enabling contextual, document-grounded, and enterprise knowledge search.
- Connected enterprise applications, SDK layers, MCP services, AI agents, and backend APIs to enable end-to-end workflow automation.

Certifications

- **AWS Certified AI Practitioner** – Amazon Web Services

Education

Siksha 'O' Anusandhan University

B.Tech in Computer Science & Engineering — CGPA: 8.50/10

Aug 2020 – Jul 2024

Bhubaneswar, Odisha
