

Summary

Product Engineer with strong experience in **AI/ML and software development**, specializing in **NLP-driven systems, Self-Attention CASUALLM models**, and **API-based architectures**. Proficient in **Python and Java** with hands-on experience in **RESTful service development, backend integration**, and **scalable system design**. Experienced in building **document-grounded AI applications** and collaborating in **Agile development environments**.

Skills

Programming & SDE Fundamentals: Python, Java, Data Structures, Algorithms, Object-Oriented Programming (OOP), Problem Solving

AI & Machine Learning: Scikit-learn, NLP, Intent Classification, Entity Extraction, Self-Attention Models, Model Evaluation, Feature Engineering

Backend & API Development: FastAPI, Spring Boot, REST APIs, Microservices Basics, API Design

Data & Tooling: Pandas, NumPy, Hugging Face, Docker, Git, GitHub, Postman, Swagger UI

Databases: MySQL, MongoDB

Experience

Tata Consultancy Services Ltd.

Oct 2024 – Present

Product Engineer

Gurugram, Haryana

- Worked on AI-driven applications using **Self-Attention CASUALLM models** for contextual, document-grounded responses.
- Developed and maintained **Rasa-based NLP services** implementing intent classification, entity extraction, and dialogue flows.
- Integrated AI components with backend systems using **RESTful APIs**, ensuring reliable data exchange and low-latency responses.
- Contributed to **backend development in Java and Spring Boot** following clean code practices and modular service design.
- Collaborated in an **Agile environment**, participating in requirement analysis, testing, and iterative enhancements.

Soven Developer

Jun 2024 – Sept 2024

Frontend Developer Intern (Remote)

- Built responsive UI components and integrated them with backend APIs for data-driven web applications.
- Improved usability by collaborating with designers and backend engineers to refine UI behavior.

Persistent Systems

Jun 2023 – Aug 2023

Software Developer Trainee (Remote)

- Completed structured training in Python, DBMS, Linux/Unix, and Data Structures.
- Applied programming concepts through hands-on coding assignments and exercises.

Projects

Conversational AI Platform

Rasa, Python, FastAPI, REST APIs

- Designed and developed an AI-based system using **Rasa** for intent classification and entity extraction.
- Integrated backend services through **REST APIs** to dynamically fetch and process data from external systems.
- Focused on **scalability, maintainability, and error handling** for production-level usage.

Airline Management System

Java, Spring Boot, MySQL, Angular

- Developed a full-stack airline management system following **software engineering best practices**.
- Implemented **RESTful backend services** using Spring Boot and managed relational data using MySQL.
- Applied **OOP principles** and modular design to improve maintainability.

Certifications

- **AWS Certified AI Practitioner** – Amazon Web Services

Education

Siksha ‘O’ Anusandhan University

Aug 2020 – Jul 2024

B.Tech in Computer Science & Engineering — CGPA: 8.50/10

Bhubaneswar, Odisha
